

NEW IMPROVED COVER

✓ **New 304 EZ-Release Ratchet**

This ratchet has a special patented barrel which allows the webbing to release with ease. It is rated at 1,100 lbs. of tension and can spool more webbing onto the barrel.

✓ **New Molded Ratchet Boot**

Special designed compression molded pocket to prevent any impact damage from the new ratchet. It is super protection and has a plastic strip barrier that is under the ratchet preventing any contact with the boot. Hem strap webbing is now pre-measured so pulling out slack prior to tensioning is no longer necessary
